chemical free

ABOUT US

Raja Timur Nasional (RTN) is an Indonesia based service provider that specialized in HVAC Cooling Coil Dry Steam Service. With our company tagline 'True Cool and Clean Air Experts', we are capable of guaranteeing better air flow and prolonging the lifetime of existing cooling coils.

Using HINATA's Super-Heated Dry Steam technology, our vision is to provide customers with a permanent solution of using total Chemical Free and Eco-Friendly technology.

OUR GROWTH

HINATA's technology has its root from Malaysia since 2016. Various important industries in Malaysia have benefitted from this technology, such as: - International Airports, 5-Star hotels, A-Class Shopping Malls, International Manufacturing Plants, Hospitals and etc.

Expanding its technology to Indonesia, within a year in business, there are already a few Hotels and Shopping Malls that have started using our services to assist them in improving and maintaining their HVAC performance.

CUTTING EDGE TECHNOLOGY

Specializing in improving the air flow of HVAC, HINATA's technology is capable of giving a total cool and clean cooling coil of any sizes within 30cm coil thickness.

HINATA Super-Heated Dry steam machine is capable of consistently producing high pressure dry steam without using any chemical, allows deep penetration into the coil while pushing out up to 99.9% of the residues.

TARGET MARKET

We are looking forward to working with customers who have high demand or standard in their HVAC performance such as Hotels, Shopping Malls, Office Towers, Hospitals and etc.

By having consistent good air flow and temperature on their HVACs, we are confident that our customers will save more operation costs in the long run and further improve their businesses by attracting more crowd in the future.

FUTURE GOALS

We believe that by using the right preventive maintenance method, our customers will enjoy long term consistent good HVACs performance which is cost efficient, longer lifetime and be part of the eco-friendly communities who try to make this environment a better place.
